
Just Hangin' Around

A hanging planter to catch water overflowing from the pot.

by Rosemond Ho

Materials

Steel, Aluminum, Polycarbonate, Neoprene Rubber, Water

Processes

TIG / Oxy-acetylene Welding, Turning, Powder Coating

Design Goals

To create a hanging planter pot that could retain and track water volume

Challenges

There were many times when I jumped ahead without doing the necessary prototyping. I also learned the wisdom in focusing on the project function and learning to let go.
